Prepare your trip information When you plan your trip, you should keep a number of things that help you prepare: what time you are traveling to and the location you are going on your trip, what time you are getting off at and what time you get back on your flight. You can do this by getting an emergency flight and then preparing a paper list of itineraries. If you have time that you can spare, get an emergency flight ticket or hotel reservation on an online travel booking service. (If you are not prepared well enough to do this, there are sites where it may be cheaper to pay for them.).. Safety first It's always advisable to go with a group of your own to protect yourself if you are alone. However, if you decide to let your friends and a few friends accompany you, this is an excellent thing to do. If you need to travel alone, get the transportation arranged with someone who knows the region.. Be careful when driving — it's best to drive carefully and with attention to your surroundings.
